

## ONE CALL, ONE SOLUTION, ONE BILL.

- PHONE SYSTEMS AND SERVICE
- VOICE, DATA AND FIBER OPTIC CABLE MANAGEMENT
- VOIP SYSTEMS AND HIGH SPEED INTERNET ACCESS
- VIDEO SURVEILLANCE

Your phone system can be integrated with desktop computing, advanced call routing, auto-attendants, multi-site call routing via IP services, along with advanced call accounting, voice mail, unified messaging and reporting software packages.

We can help you cut through all of the possibilities and find the right solution for YOUR business. Beyond establishing your phone system, our team of engineers will assemble the correct network services, application software and data hardware requirements to meet your specific needs.

**Airdis manages the building's back bone cabling which has been proven to minimize accidental down time. No one could possibly have a faster response.**

▲ As an Airdis customer, simply dial 4444 to immediately connect to our service department.

▲ Guaranteed 2-hour major failure response time.
